

MaxSpiral by Cristini
Spiral Dryer Fabric Family
Maximum Stability, Maximum Life

MaxDry CL and MaxFlat CL™

MaxClean™ is specifically designed to run on positions affected by pitch and stickies contamination.

The special modular construction allows the fabric repair in case of light damages provides extremely high seam strength and offers a very easy installation.

MaxFlat CL and MaxDry CL uses PTFE anti contamination, the advanced co-extruded monofilaments construction guarantees the fabric self-cleaning, while the internal PET core guarantees high stability and wear resistance. MaxDry CL and MaxFat CL™ spiral fabrics stay cleaner longer and are cleaned more easily, thus maintaining a uniform permeability for efficient drying.

No seam marking as spiral fabrics are endless.

Ranging from 75 to 1000 CFM, MaxClean™ & MAXFlat CL are the best answers available on the market for all dryer groups affected by contamination problems; dedicated to paper machines producing recycle grades.
